

1056	HTA 1007 H	Kit including aluminium headform with adjustable support, drop carriage, contact detector, and two strikers for SNELL/DOT/AS helmet penetration testing. Compatible with MAU 1002/2W and 1001/2W..
------	------------	--

Technical data sheet :

- **3 kg drop carriage** made of Ergal 75 plates, equipped with a conical striker (60° angle, 0.5 mm rounded tip or custom sizes according to different standards). Other geometries available (JIS , ASTM , ISEA , CSA)
- **Headform holder** sliding on two thick steel arches to ensure high rigidity and all possible headform/helmet orientation .
- **Steel pivot** for headform support, featuring a dedicated only vertical fixing point for aluminium headforms.
- **Electronic device** to record contact between the striker and the headform via a flip-flop circuit board.
- **Contact detection** via acoustic and visual signals, equipped with a reset button.
- **Different configurations** available to comply with various international standards.
