

1025 H	KIT FRP2 M	Impact test KIT for FIM - FRHPhe-02 - Includes a drop carriage with pivots , 45° inclined anvil increased length and modified anvils holder .
--------	------------	--

The kit is composed of the following parts:

- Anodized Ergal 75 drop carriage of high thickness and resistance to the deformation with pivots and blocking system in order to have a precise helmet positioning (two-part version).
- Modified anvil holder with 120 mm dia (instead that 100 mm dia) with a high-thickness base and increased-diameter bolts.
- Angular 45° longer extension anvil with CNC tooled surfaces

To be used in conjunction with:

EN 960/2006 full magnesium headforms with modified center of inertia, wireless data logging device model WIRX 6700 with DTS 6DX PRO A accelerometer, and new IDAS or old DLS series 3.00 software
